

OTIS CARMICHAEL RESUME

4101 West End QLD

0435 138 901 • ocarm0809@gmail.com

About Me

My names Otis Carmichael and I am a proud Waanyi man, studying Information Technology at the University of Queensland. In my spare time I play senior football for Taringa Rovers, create videos and express myself through movement. I have an immense love of learning that I utilise in all of my endeavors and am always seeking to continue to grow.

Experience

Business Analyst Intern • November 2020 – December 2021

Suncorp • Brisbane City

Worked within the Claims Technology team to support the implementation of business requirements to innovate the business and provide a better experience for customers. Experienced the importance of business analysis for gathering requirements and developed effective communication patterns for working in coordinated teams.

Data Analyst • October 2021 – December 2021

UQ School of Languages and Cultures • St. Lucia

Processed verbal language data into written form, cross referencing between numerous sources. This work was assisting researcher Mary Laughren on compiling the Waanyi dictionary. This experience taught me important Indigenous language skills such as how knowledge from neighbouring language groups can relate to one another, as well as technical skills with audio editing and version control softwares.

Goorie Berrimpa Officer • December 2020 – December 2021

University of Queensland • St. Lucia

As the student representative for Goorie Berrimpa, I worked to develop our community and promoted events and updates graphically through social media channels. In this volunteer role, I coordinated a team of students and staff to organize social events, the Indigenous Unigames and coordinated the 2021 NAIDOC Ball.

Indigenous Cultural Educator • March 2020 – April 2021

Nabei Education • Annerley

Worked within kindergartens teaching motor skills and values through the use of First Nation's games and stories. This was a personally rewarding opportunity to develop my own knowledge of many Aboriginal nations and their stories, whilst learning to effectively work with children.

Information Technology Internship • Dec. 2018 – Jan. 2019, Nov. 2019 – Feb. 2020

CPB • Fortitude Valley

This internship experience saw me shadow members of the ICT leadership team, learning about their roles and career pathways. This experience taught me how to conduct myself professionally and gave me insight into the Information Technology industry.
